

Friends and Colleagues,

The Somers Energy Environment Committee, an arm of the Town Board, is committed to protecting the Town of Somers' environment and quality of life while executing a plan to create a sustainable, energy efficient community for the future.

After months of work we now have a multi-year plan that requires volunteers to execute and complete. If you have interest in and knowledge of *project leadership, alternative energy technology (solar, wind, geothermal), land, water and waste management, education, finance, grant application, transportation planning, farming, or, just want to be part of the Town's transformation* – WE NEED YOU.

We are looking for individuals to join the SEEC and help lead and support the various projects that are summarized below;

Overview of the Somers Sustainability Action Plan

- ✓ **Educate all residents and businesses and initiate a collaborative effort to execute the plan.**
- ✓ **Expand Energize Somers**
- ✓ **Preserve, conserve and optimize the existing natural resources of the Town through better management and technology.**
- ✓ **Reduce the Town's dependence on oil and gas for the generation of cooling, heating and power**
- ✓ **Provide a future environment free of pollutants in air, land and water.**
- ✓ **Improve the standard of living as it relates to our coexistence with our environment**

Please contact Herb Oringel (herb@oringel.com) or Mike Blum (mblumnn49@gmail.com) to express your interest and/or get clarification. Thank you!
