**DETERMINATION OF ENVIRONMENTALLY SENSITIVE LAND:**

In view of the fact that we are unable to make a proper determination of existing conditions as required by the GENERAL REQUIREMENTS FOR ENVIRONMENTALLY SENSITIVE LANDS LOCAL LAW NO. 3 of the year 1990, we have referred to the Town Wetland Maps, Topographic Maps, and Zoning Map as a guide, and based on a field inspection, find that the location of the project parcel does not fall within environmentally sensitive lands as shown on said maps or as identified below. Therefore, it is our interpretation and consensus that the project land should not be considered subject to the regulations of said Local Law No. 3 of the year 1990 unless more detailed information and interpretation of existing conditions by others more qualified prove that the subject area should not be considered under said Local Law.
