

Robert P. Astorino
County Executive

Department of Human Resources

Mary Jennings Mahon
Commissioner

The Westchester County Department of Public Works and Transportation is seeking Engineers to work on a variety of projects in this operationally diverse department. The Public Works Engineering Division services the Westchester County Airport and over 2 million square feet of building and office space, as well as 135 miles of roadways.

In addition to responding to both basic and complex infrastructure needs, working for Westchester County creates career-growth opportunities for highly motivated and innovative Engineers to participate in a variety of projects and engineering disciplines such as design and construction management, highway, bridge, and dam maintenance and construction, architectural and watershed management. Westchester County is also committed to environmentally sustainable practices in our engineering operations.

Westchester County is only 30 miles north of New York City with the Long Island Sound on the southeast and the Hudson River on the west. In addition to the diversity of the work, Westchester County also offers employees a work/life balance uncommon in the engineering field, and a compensation package that includes comprehensive medical, dental, vision benefits, deferred compensation, paid leave and the NYS retirement plan. Our central offices are located in White Plains, the hub for many businesses and retail shops.

If you're interested in pursuing an engineering career with us, we are seeking architectural, civil, electrical, environmental, mechanical, and transportation engineers. We also have vacancies in technical surveying work. Come join our team!

Please submit your cover letter and resume to jobs@westchestergov.com with "Engineer" in the subject line.
